Advanced PL/SQL Instrumentation: Implementing A Logging Interface Using Oracle Object Types

Abstract:

Reduce and Reuse: a radically practical introduction to Green programming in the real world.

How to implement a straightforward interface for PL/SQL packages, using an actual example based on over 7 years of production testing in high performance environments.

Using object interfaces to reduce complexity and the hidden costs associated with thoroughly instrumented PL/SQL code.

Session Overview:

Real Time, On-Demand ETL Process Monitoring.

Tracing and Control: Costs and Benefits.

Object Types To The Rescue.

Details of the Implementation.
